

ChefMate POS System - Complete Documentation

System Overview

ChefMate is a comprehensive Point of Sale (POS) system designed for restaurants, cafes, and food service businesses. It provides complete restaurant management including inventory, sales, reporting, and customer management.

Core Features

1. Dashboard & Analytics

- **Real-time Analytics**: Live sales data, revenue tracking, and performance metrics
- **Visual Charts**: Sales trends, top-selling items, and revenue analytics
- **Quick Access**: Direct access to key functions and recent activities

2. Master Data Management

- **Customer Management**: Add, edit, and manage customer information
- **Supplier Management**: Maintain supplier database with contact details
- **Table Management**: Configure dining tables for restaurant operations
- **Category Management**: Organize menu items by categories and subcategories
- **Payment Options**: Configure multiple payment methods (Cash, Card, UPI, etc.)

3. Inventory Management

- **Item Management**: Add new menu items with pricing and descriptions
- **Stock Management**: Track stock levels, add new stock, and manage inventory
- **Product Management**: Create and manage product variants
- **Stock Reports**: Generate inventory reports and low stock alerts
- **Automated Alerts**: Get notified when items are running low

4. Sales & POS

- **Point of Sale**: Complete POS interface for order taking and billing
- **Advance Orders**: Pre-order system for customers
- **Multiple Tax Systems**: Support for both GST and VAT tax calculations
- **Order Management**: Track orders from placement to completion
- **Bill Generation**: Professional invoice generation with company branding

5. Financial Management

- **Voucher System**: Receipt and payment vouchers for accounting
- **Expense Tracking**: Record and categorize business expenses
- **Tax Management**: Configure tax rates and calculate tax automatically
- **Financial Reports**: Comprehensive financial reporting

6. Reporting & Analytics

- **Sales Reports**: Daily, weekly, monthly sales analysis
- **Item-wise Reports**: Performance analysis by menu items
- **Customer Reports**: Customer purchase history and preferences
- **Supplier Reports**: Supplier transaction history
- **GST/VAT Reports**: Tax compliance reports
- **Low Stock Reports**: Inventory monitoring
- **Ledger Reports**: Customer and supplier account statements

7. User Management & Security

- **Role-based Access**: Admin, Cashier, Account user roles
- **User Profiles**: Individual user accounts with permissions

- **Profile Management**: Update user information and preferences
- **Security**: Secure login system with session management

8. System Settings

- **Core Settings**: Basic system configuration
- **Company Information**: Business details and branding
- **Tax Configuration**: Set up tax rates and types
- **Units Management**: Configure measurement units
- **Currency Settings**: Multi-currency support

Technical Features

Responsive Design

- **Mobile-first**: Optimized for tablets and mobile devices
- **Touch-friendly**: Easy-to-use interface for touch screens
- **Cross-platform**: Works on all modern browsers

Data Management

- ****Real-time Updates****: Live data synchronization
- ****Data Backup****: Automatic data backup and recovery
- ****Export Options****: Export reports in various formats

User Roles & Permissions

Admin (Full Access)

- Complete system access
- All menu items and features
- User management
- System configuration
- Full reporting suite

Cashier (Limited Access)

- Dashboard analytics
- POS operations
- Basic sales reports
- Voucher management
- Customer transactions

Account (Financial Focus)

- Financial reports
- Accounting features
- Expense tracking

- Tax reports
- Ledger management

Integration Capabilities

- ****Payment Gateways****: Integration with multiple payment processors
- ****Accounting Software****: Export data to accounting systems
- ****Kitchen Display****: Real-time order display for kitchen staff
- ****Customer App****: Mobile app for customer ordering

Security Features

- ****User Authentication****: Secure login system
- ****Data Encryption****: Protected data transmission
- ****Session Management****: Automatic logout for security
- ****Access Control****: Role-based permissions
- ****Audit Trail****: Track all system activities

Scalability

- ****Multi-location Support****: Manage multiple restaurant locations
- ****Cloud-based****: Accessible from anywhere
- ****Performance Optimized****: Fast response times
- ****Modular Design****: Add features as needed

Support Features

- ****Help Documentation****: Comprehensive user guides
- ****Training Materials****: Video tutorials and guides
- ****Technical Support****: Professional support team

- ****Regular Updates****: Continuous feature improvements
